Professional Summary

Computer Science and Engineering undergraduate and entry-level Software Developer / Full-Stack Developer with hands-on experience across 3 full-stack projects and 2 internships. Skilled in Java, C++, JavaScript, Python, Data Structures and Algorithms, OOP, DBMS, and MERN-stack application development. Build responsive web applications and backend services using React.js, Node.js, Express.js, MongoDB, MySQL, RESTful APIs, JWT authentication, Socket.io, Git, GitHub, and Postman. Strong foundation in problem solving, API development, database design, debugging, testing, and software engineering workflows.

Education

IMS Engineering College, Ghaziabad
B.Tech in Computer Science and Engineering

October 2023 - July 2027
GPA: 7.5/10

Experience

IBM PBEL - AI Intern

June 2026 - Present

Generative AI | Prompt Engineering | Python

- Selected for a 60-hour IBM-AKTU PBEL internship focused on enterprise AI application development, generative AI, and prompt engineering.
- Developed Python-based AI application workflows through 4 stages: prompt design, implementation, iterative testing, and output validation.
- Applied software development lifecycle practices across 5 areas: problem analysis, coding, testing, debugging, and project-based delivery.

Unified Mentors Private Limited - Web Development Intern

June 2026 - July 2026

Web Development | Frontend Development

- Developed mobile-responsive web interfaces using a 3-technology frontend stack: HTML5, CSS3, and JavaScript.
- Implemented, tested, and debugged application features across 3 quality areas: responsiveness, usability, and functional reliability.
- Practiced software development workflows including feature development, browser testing, debugging, and bug fixing.

Projects

Roadside Assistance Platform

June 2026 - Present

React.js | Node.js | Express.js | MongoDB | Socket.io | JWT

[Live Demo](#) | [GitHub](#)

- Built a MERN-stack roadside assistance platform covering 7 workflows: mechanic discovery, service booking, towing, breakdown repair, battery jump-start, flat-tire repair, and fuel delivery.
- Developed RESTful API endpoints across 6 backend modules: authentication, vehicle management, bookings, partner verification, service workflows, and CRUD operations.
- Implemented JWT authentication and role-based authorization for 3 user roles: User, Partner, and Admin.
- Designed MongoDB data models and real-time service tracking workflows using Socket.io.

LearnNexus - Smart Study Guidance Platform

October 2025 - May 2026

React.js | Node.js | Express.js | MongoDB | JavaScript

[Live Demo](#) | [GitHub](#)

- Developed a MERN-stack smart study guidance platform with 4 core modules: personalized study plans, learning roadmaps, task management, and centralized resources.
- Implemented 4 learner workflows: authentication, progress tracking, task management, and user-specific productivity flows.
- Built reusable responsive React.js components and integrated REST APIs for frontend-server communication.
- Designed MongoDB schemas for 5 entities: users, learning activities, tasks, resources, and progress tracking.

Online Parking Management System

December 2025 - January 2026

HTML | CSS | JavaScript | PHP | MySQL

[GitHub](#)

- Developed a PHP/MySQL parking management system supporting 4 workflows: parking search, reservation, payment, and cancellation.
- Implemented real-time parking slot availability and database updates to reduce double-booking risk.
- Integrated 2 location features, Google Maps and GPS, for parking discovery and navigation.

Technical Skills

Languages: Java, C++, JavaScript, Python

Frontend: HTML5, CSS3, React.js, Responsive Web Design

Backend: Node.js, Express.js, PHP, RESTful APIs, CRUD, JWT Authentication, Authorization, Socket.io

Databases: MongoDB, MySQL, SQL, DBMS

CS Fundamentals: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks

Tools: Git, GitHub, VS Code, Postman

Achievements & Activities

- Active member of the College Gaming Club; organized and managed tournaments, event planning, and student participation.
- Built 3 real-world full-stack applications with authentication, REST APIs, database management, responsive UI, and real-time communication.
